**Some interesting demographics:**

The link to this YouTube clip is worth watching. See it first.

<http://www.youtube.com/watch?v=6-3X5hIFXYU> (right click 'open hyperlink')

The fertility rate in N.Z is about 2.13

The fertility rate in Australia 2.0

Not nearly as bad as Europe, but still ideally needs about a 2.78 fertility rate.

It is true that Muslims don't need to fight to gain world domination, it is simply done by having more children.

It must be said of course that not all Muslims are radical. Nations such as Morocco, Turkey, Jordan etc. are strongly against Iran type extremism, and working toward greater democracy. In fact because of Muslim extremism where they're killing their own, huge numbers are becoming more pro Israel and the US. Example: Morocco is pro Christian and the Jews. Also, millions of Muslims are becoming born again Christians.

There are huge changes taking place at an alarming rate. The World Wide Web allows for tremendous speed in communications. For instance in wars of earlier times, it would be days and months before they'd receive instructions, perhaps by pigeon or horseback rider.

Now we have army controllers sitting in their home country fighting a war several thousand of kilometres away through unmanned aircraft.

All this means we have to be urgent with spreading the gospel of Jesus, and making disciples who live and teach the principles of His Kingdom.

Love and blessings from,

John (Walton)
